NAME

select – general selection program

SYNOPSIS

select

DESCRIPTION

select probes the classification file using slct. By default, the classification file is assumed to be $MYSIFDEC/CLASSF.DB, but the slct program allows the user to give a full path name for the classification file, thereby allowing both the filename and the directory to be changed.

ENVIRONMENT

SIFDEC

Parent directory for SifDec.

MYSIFDEC

Home directory of the installed SifDec distribution.

MASTSIF

A pointer to the directory containing the CUTEr/SifDec problems collection.

AUTHORS

A.R. Conn, N.I.M. Gould, D. Orban and Ph.L. Toint
